

ARCTIC BIRDS BREEDING CONDITIONS SURVEY

supported by the International Wader Study Group and Wetlands International's Goose and Swan Specialist Groups

PART TWO: please complete a separate form for each year and each site visited

This is the second part of a questionnaire that aims to collect information about the breeding conditions for birds through the Arctic as contribution to the database of International Wader Study Group and Wetlands International's Goose and Swan Specialist Groups, established in the Moscow State University, Russia. You should complete this second part after filling in part one which covers general information on environmental conditions at locations where field studies have been made. This second part is available in different versions for different parts of the Arctic, and enables more detailed information on the presence and breeding success of individual species to be recorded.

If you can fill in this part of the questionnaire it will help to build up an improved picture of Arctic bird diversity.

There are three versions of the part 2 questionnaire: one for Greenland, Iceland, Svalbard and northern Scandinavia; one for Alaska and Canada; and one for Russia. Please ensure that you have the correct form for your study site.

The database is being continually updated, and we are interested in completed forms not only from the current field season, but also from previous years including from expeditions that may already have published material elsewhere. Current information about the project, access to the database and survey bulletin issues can be obtained from <http://www.arcticbirds.net>. Contributors will receive annual bulletin summarising information on the breeding conditions for birds in the Arctic.

We would greatly appreciate feed-back and completed forms from all those active in Arctic fieldwork, as well as ideas and comments from any interested party.

see <http://www.arcticbirds.net> for more information

1. Summary details of respondent and survey site

Note: this section assumes that you have already filled in a Part One questionnaire for your site - the information here is needed to ensure that Parts One and Two for each site can be correctly linked.

YEAR: _____

1.1 RESPONDENT:

1.3 PHONE:

1.2 ADDRESS:

1.4 FAX:

1.5 E-MAIL:

1.6 COUNTRY:

1.8 CO-ORDINATES

1.7 SITE NAME:

2. Bird species present and/or breeding

Please tick relevant boxes

Notes: **Breeding:** evidence of courtship, copulation, nest-scraping, nest with eggs, freshly used nest or egg-shells found.

Hatching successful: unfledged chicks seen; adults carrying food; adult alarm-calling near brood.

Fledging successful: recently fledged young seen.

If you are sure that certain conspicuous birds (swans, snowy owl, skuas) were **NOT breeding/hatching/fledging**, put “NO” near appropriate box. If **breeding density surveys** were undertaken, please give average nest density and briefly describe survey area and methods in section 4 below.

3. Seabird breeding colonies

3.1 Were seabird colonies present?: Yes ; No . If yes, how many:.....

3.2 If yes, please list species in the colony:

4. Bird breeding density surveys

4.1 Did you make any surveys of breeding shorebirds/waders ; wildfowl ; or other species

4.2 If yes, what method(s) did you use: Intensive nest search ; Transect plot ;
 Territory mapping ; Line transect ; Timed plot search ;
 Other (please name method)

4.3 Give summary of breeding density surveys made:

Total survey area	No. of survey plots	Size of survey plot(s) (ha)	Brief description of methods

5. Non-breeding aggregations of birds

5.1 Were any aggregations of moulting, roosting, or feeding birds present ?

Yes ; No .

5.2 If yes, please list species and numbers:

Species	Moulting, roosting, or feeding?	Numbers

6. Lemmings/voles

6.1 Were lemmings ; or voles ; present in your study area?

6.2 If so, please complete the table below:

Species present (list names)	Abundance (tick one box per species)			How often did you meet lemmings/voles? Did abundance change during the summer? If so, how? Do you have capture data?
	Rare	Common	Abundant
